WORK EXPERIENCE

JAN 2018-FEB 2019 — Software Developer at HUBII AS, *Ethereum Development*
- Lead developer of hubii core. hubii core is an open source cross-platform Ethereum wallet manager and exchange connected to hubii's enterprise-focused Ethereum second layer scaling solution. Built using the Electron/React/Redux stack.
- Contributed to the design and implementation of the nahmii JavaScript SDK and nahmii CLI.

SUMMER 2018 — Summer Intern at DELOITTE, *Digital Consulting*
- Took initiative to greatly improve the accuracy and speed of Deloitte's QA pipeline by automating visual regression testing with BackstopJS. The automation freed hours of weekly developer time.
- Completed front-end development tasks for a major government agency.
- Received a graduate offer from the Deloitte Digital Consulting team as a result of a positive review.

AUG-DEC 2017 — Software Developer at CROWD MOBILE, *Mobile Entertainment*
- Assisted Crowd Mobile in their transition from using Angular 1.6 to a React/Redux stack for their internal admin web applications.

JUN-AUG 2017 — Co-Head Teacher at CODE CAMP, *Coding Education*
- Taught kids how to develop apps by block-coding. Managed the classroom and led Teaching Assistants to help every student make their very own killer app.

EDUCATION

2016-PRESENT — **Bachelor of Science** at THE UNIVERSITY OF MELBOURNE
Taking a leave of absence from mid-2018 to mid-2019 to pursue career opportunities.
MAJOR: Computing and Software Systems
CLUBS: CISSA (Computing Students Association) Committee, Industry Liaison
GRADE: Second Class Honours

2018 — **Ethereum Developer Program** at CONSENSYS ACADEMY
10-week course covering Ethereum smart contract and dApp development.
GRADE: 95.6/100

PROJECTS

2018-PRESENT — **Glacier Wallet**
Glacier Wallet is a fire-proof, corrosion-resistant, theft and loss resistant cryptocurrency mnemonic backup solution. Expected to become available for purchase mid-2019.

2018 — **Speed Checkers dApp**
Test your skills and wager ETH playing checkers on the Ethereum blockchain.

2017 — **Cryptocurrency Arbitrage Bot**
Taking advantage of inefficiencies between Australian and international markets during the crypto bubble of 2017, the bot provided on average over $10,000 of liquidity to Australian markets every week.

2017 — **Handy Handbook Tool**
Browser extension that greatly improves the user experience of the University of Melbourne subject handbook.

2017 — **BACon**
React Native mobile application to help drivers track their blood alcohol content.
